For annoying ads, partly to make me quite uncomfortable in most free games is that ads appear quite a lot. Moreover, the gameplay of the game is not very new, because the whole game is repetitive music. But in exchange for each level you can enjoy different music with the speed and appearance of the music constantly changing. When playing games, you need to be quick and accurate, not every specific strategy. Solution: If you're tired of advertising, download Magic Tiles 3 MOD APK, the version that has MOD VIP and remove ads so you don't have any problems in the game.
